Garden Checklist

1. This is the best time to plant, transplant, or separate bamboo. To give the plants a good start, mix peat moss and ground bark into the soil where they are to grow.
2. Water camellias frequently and keep a 2-inch mulch over the root area. Feed with acid fertilizer if you haven't done so since the plants have finished flowering. You can make tall, rangy plants more compact by pruning now.
3. Don't forget to set out chrysanthemums this month in deep, rich soil and keep them fed, watered and pinched back for spectacular bloom.
4. Nurseries have a good selection of geraniums and pelargoniums now for bright splashes of instant color to replace spring bulbs.
5. Plant dwarf Unwin dahlias from flats, and other dahlias as tubers this month.
6. This is the time to start your fuchsia collection or add to the ones you have. Your nursery has an enormous selection of fine young plants, ready for potting or setting in the garden in shady spots. When planting, use 1/3 soil, 1/3 leafmold, 1/3 well rotted steer manure or a good commercial planting mix. Pinch out the tips to force side branches for heavy summer bloom.
